

Technical Assistance Allocation

WIFA Policy #: II.4

Purpose:

Describe the types of and funding sources for Technical Assistance offered by WIFA

Policy:

WIFA allocates funding for the following types of Technical Assistance:

- Planning and Design Technical Assistance – assists individual drinking water or wastewater systems to conceive, plan, design, or develop infrastructure projects. Refer to Procedure II.4.1.
- Professional Technical Assistance – includes studies, surveys and other types of reports that provide benefit to a range of drinking water and wastewater systems statewide.
- Staff Technical Assistance – means funding for a specific water or wastewater treatment facility to assist that system to improve its operations.

Technical Assistance funding may come from the following sources:

- Drinking Water set-asides
- Fees (Clean Water and Drinking Water)

WIFA will allocate set-aside funding in accordance with EPA regulations. The amounts of funding allocated to each type of Technical Assistance, if any, will be included in the Clean Water and Drinking Water Intended Use Plans.

Responsibility: Senior Program Administrator
