WIFA Announces Federal Stimulus Funds Part of \$4.2 Million Loan to the City of Mesa

PHOENIX (Aug. 21, 2009) – The Water Infrastructure Finance Authority of Arizona (WIFA) announced today that it will close \$4.2 million in loans, which includes in part federal stimulus money, with the City of Mesa.

Mesa received four loans totaling \$4.2 million for the installation of 10,000 feet of water service lines, redrilling a 20-inch well in the downtown area that was originally drilled in the 1950s and replacing pumps to accommodate fluctuating demand. The loan money also includes a wastewater project that replaces sulfides stations located at Horne and Southern Avenue, and at Guadalupe and Alma School Roads.

“These funds provide much-needed help for these important drinking and wastewater projects. We’re pleased to make this loan, making the most of Arizona’s precious water resources and protecting public health and safety,” said WIFA Board Chairman Benjamin H. Grumbles, who is also Director of the Arizona Department of Environmental Quality.

WIFA received about \$82 million from the American Recovery and Reinvestment Act (ARRA) of 2009 to fund wastewater and drinking water projects in Arizona. One of the goals of ARRA was to have at least 50 percent of the total amount of grant proceeds allocated to projects under construction by June 17, 2009. There are presently 35 projects under construction in Arizona representing 70 percent of the grant proceeds for the state.

WIFA maintains and improves water quality in Arizona by providing communities and private water systems with access to low-interest financial assistance and technical assistance needed for basic water infrastructure. For more information, please visit WIFA’s Web site at www.azwifa.gov.
